

# ForeseeHome

## TALK TRACK

### IDEAL PATIENTS:

- **Unilateral or bilateral Intermediate dry AMD diagnosis**
- **Unilateral dry AMD with wet fellow eye**
- **BCVA of 20/60 or better**

## RESOURCES:

- ✓ ForeseeHome Patient Brochure
- ✓ Additional ForeseeHome resources as necessary (ask your account manager about options)

## WHEN TO INTRODUCE FORESEEHOME:

After the patient has been identified as an appropriate candidate.

## TALKING POINTS:

- ✓ You have *intermediate dry AMD*, which may convert to the more serious form of the disease called *wet AMD*
- ✓ Studies show that catching the conversion as soon as possible will give you the best chance of maintaining your vision
- ✓ I strongly recommend that you enroll in the *ForeseeHome AMD Monitoring Program* to help monitor your disease at home
- ✓ I'll be alerted to significant changes that may warrant you coming in for a follow-up visit
- ✓ It's *FDA cleared* and covered by *Medicare*
- ✓ I will be submitting a referral to *Notal Vision*. Here's a brochure with more information [hand patient *ForeseeHome* brochure]. Call the number on the back to get started and the *Notal Vision Monitoring Center* will take care of the rest
