

ForeseeHome AMD Monitoring Program

An early warning system for your eyes

You take an easy, daily test that checks for tiny distortions in your vision. **Just a few minutes per day (per eye)**

Data from each test is sent to the Notal Vision Diagnostic Clinic (provider of ForeseeHome) for evaluation and then provided to your eye doctor

If a change in test scores is detected, the Notal Vision Diagnostic Clinic alerts your doctor. Your doctor's office will then contact you directly to schedule a follow up visit

Covered by Medicare and most private insurance
